Figure 10B is a cross-sectional view of a substrate 10B. It shows a multi-layered structure with a central layer 11 and two outer layers 80 and 81. The central layer 11 is divided into three segments by two vertical dividers 13. The top surface of the central layer 11 is covered with a series of small, rounded protrusions 12. The bottom surface of the central layer 11 is also covered with a series of small, rounded protrusions 12. The thickness of the central layer 11 is indicated as H1, the thickness of the outer layer 80 is indicated as H2, and the thickness of the outer layer 81 is indicated as H3.

( A )

( B )

A cross-sectional view of a multi-layered structure 372D. The structure consists of several layers: a top layer 380, a layer 390 with circular features, a layer 3110 with vertical features, a layer 3112 with vertical features, a layer 3114 with vertical features, and a bottom layer 3116 with rectangular features. The layers 3110, 3112, 3114, and 3116 are collectively labeled as 372D. Below the bottom layer 3116 is a layer 76 with circular features.

A cross-sectional view of a multi-layered device 370. The device consists of a top layer 378, a middle section 380, and a bottom layer 376. The middle section 380 is composed of several layers: 3110, 3112, 3102, 3114, and 3116. The device is supported by a series of circular elements 382 and 388. A bracket 372 D indicates the middle section 380.
